- D7.2 REETS Implementation Knowledge Base
- D7.3 Report on REETS Interoperability Management Platform
- D7.4 Options for a sustainable REETS/EETS Interoperability Management Platform

The work is performed in small teams per deliverable.

Output of Activity 7: Implementation and Operation

Output of Activity 7: Implementation and Operation

Information Platform & Help Desk: Benefits

Structured and Comprehensive

Content:

- ✓ REETS Toll Domain Statements
- ✓ Terminology
- ✓ Accreditation
- ✓ Up to date links
- ✓ Service Providers
- ✓ On-Board-Units
- ✓ Toll Domain regulations
- ✓ Toll Domain requirements
- ✓ ...

Users

- EETS Providers
- Users
- Toll Chargers
- Technology Providers
- European Institutions

REETS TEN Project overview

09 | 2013 12 | 2013 06 | 2014 12 | 2014 06 | 2015 12 | 2015

Activity 0 – Project Management

Activity 6 – Return on Experience

ANALYSIS PHASE

Activity 1 Contractual Framework and Risk Mgmt

Activity 2 Certification

Activity 3 KPI

Activity 4 Back Office Interfaces

EVALUATION EC

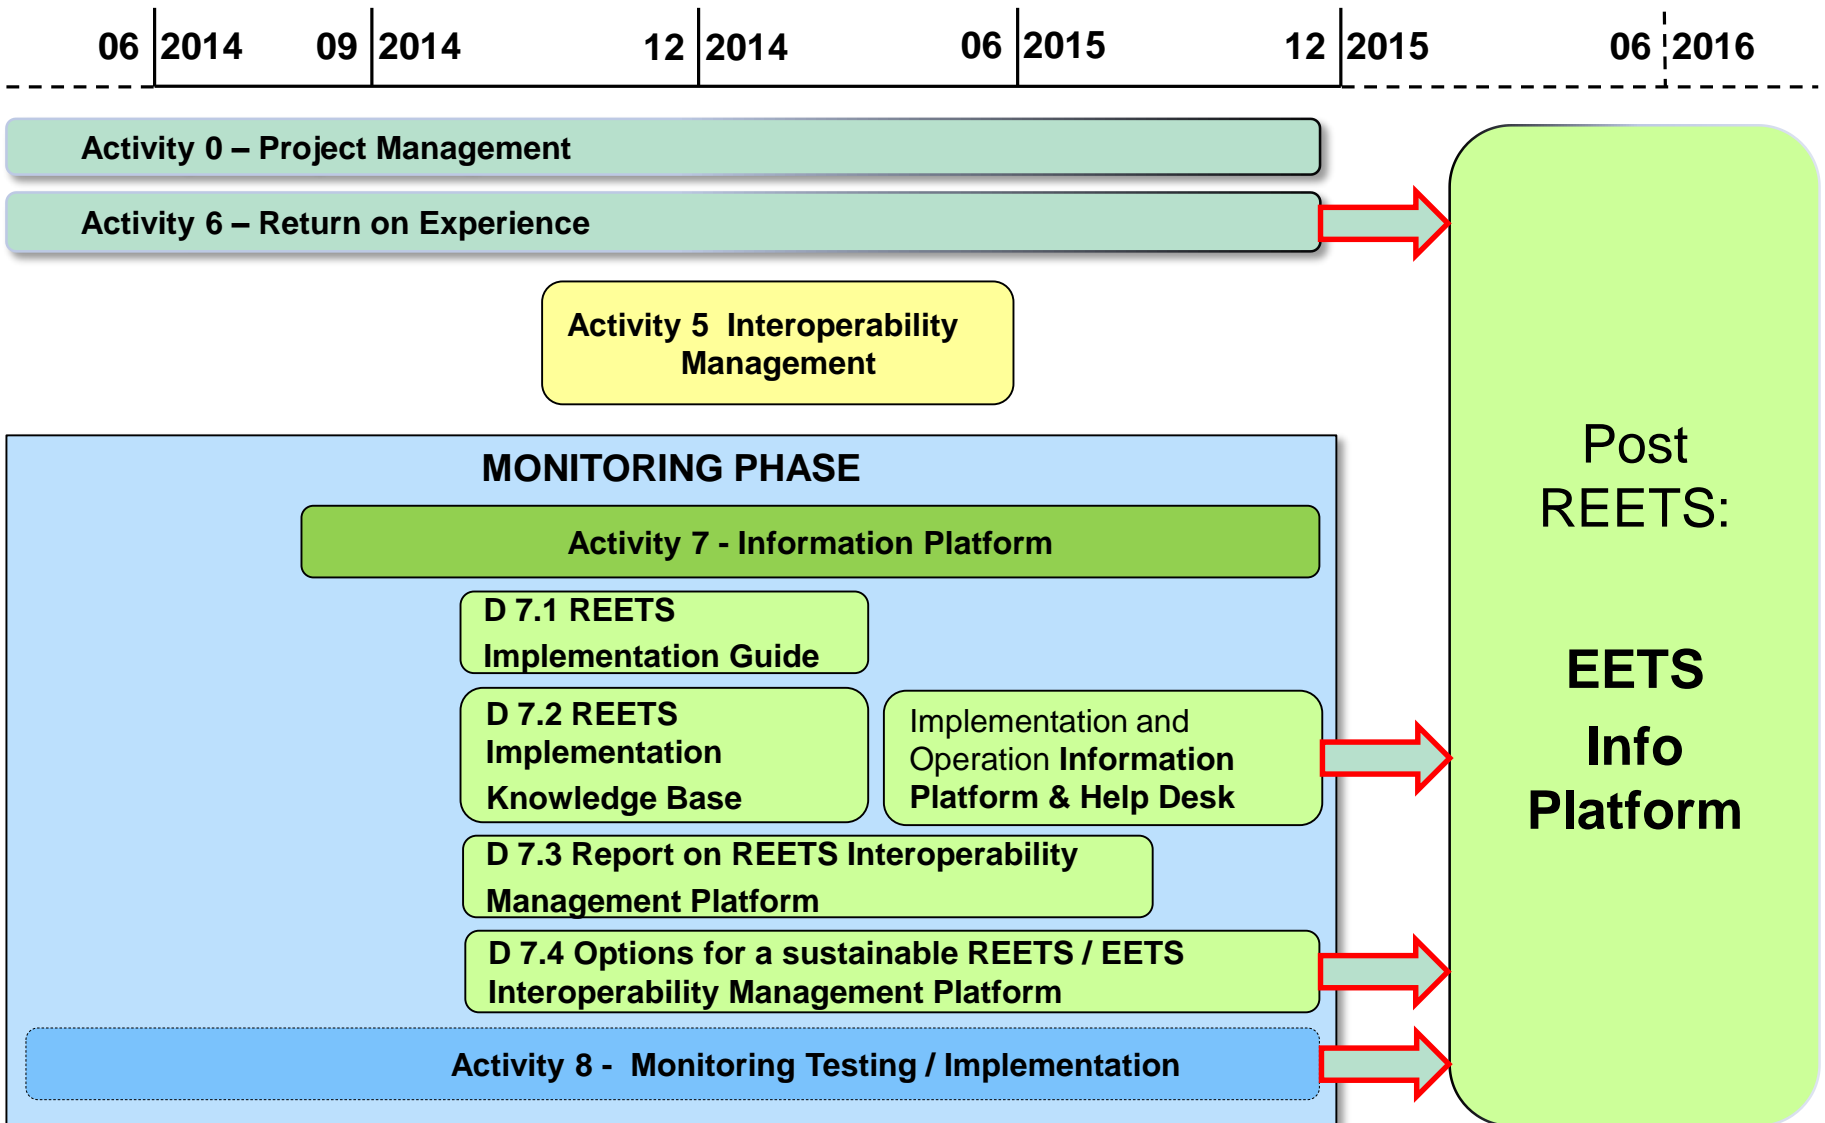

Activity 5 Interoperability Management

MONITORING PHASE

Activity 7 - Information Platform

Activity 8 - Monitoring Testing / Implementation

Information Platform Implementation schedule

Information Platform & Help Desk Conclusions

The Information Platform & Help Desk is more than just a database of “static information“ about EETS/REETS, ...

...it contains a comprehensive knowledge base as a shared information resource

...it contains up-to-date information

...it contains a single point of access through the help desk

... is managed by the REETS TEN Project under the developed interoperability management rules for the Information Platform

... allows interactive exchange of information about REETS/EETS between (professional) stakeholders

... and provides a solution for an sustainable EETS Info Platform.
